1. IMPORTANT DEFINITIONS (Very Scoring)

Term	Definition (Easy & Perfect for Exams)
I/O Devices	Devices that help the computer take input (keyboard, mouse, scanner) and give output (monitor, printer).
Device Management	OS function that manages all input/output devices, keeps track, allocates & deallocates devices.
Dedicated Device	A device used by only one job at a time (e.g., printer, card reader).
Shared Device	A device that can be shared by multiple jobs at the same time (e.g., disk).
Input Device	Devices used to enter data into the computer.
Output Device	Devices used to show or print the processed result.
Storage Device	Devices used to store data permanently or temporarily.

2. TABLE OF INPUT DEVICES (Most Important)

Device	Key Features	Easy Way to Remember
Keyboard	Types text, special keys, numeric pad	“Typing device”
Mouse	Moves pointer, has buttons, optical/ball type	“Point + Click”
Optical Mouse	Uses LED + sensor (no ball), accurate	“Light-based mouse”
Microphone	Records sound, voice input	“Sound input”

Smart Card Reader	Reads ATM-like cards with magnetic strip/chip	“For secure data access”
Light Pen	Used on screen for drawing/pointing	“Pen for screen”
Touch Screen	Input by touching finger/stylus	“Touch = Input”
Scanner (Flatbed/Drum)	Converts paper pictures/documents to digital form	“Paper → Computer”
Digital Camera	Captures photos digitally, transfers to computer	“Photo input”
Joy Stick	Gaming input device	“Game controller”
OCR (Optical Character Recognition)	Converts printed text → editable text	“Scan → Text”
Bar Code Reader	Reads barcode using laser	“Fast billing machine”

3. TABLE OF OUTPUT DEVICES

Category 1: Soft Copy Output (Shown on screen)

Device	Key Features
Monitor (CRT, LCD)	Displays text + graphics, CRT uses tube, LCD is flat panel
LCD / Flat Panel Display	Uses liquid crystals, high clarity, low heat, modern

Category 2: Hard Copy Output (Printed on paper)

Device	Key Features	Memory Trick
Impact Printers	Print by physical contact	“Hit & Print”
Dot Matrix Printer	Pins + ribbon, low cost, noisy	“Pin printer”
Daisy Wheel Printer	Prints characters fixed on wheel, very slow	“Typewriter style”
Line Printer	Prints one line at a time, very fast	“Huge office printer”

4. TABLE OF STORAGE DEVICES

Storage Type	Features	Example
Serial Access Device	Data accessed in sequence only	Magnetic Tape
Direct Access Device	Any data accessed directly	Hard Disk, SSD
Magnetic Tape	Slow, cheap, used for backup, serial access only	Tape backup units
Hard Disk / Magnetic Disk	Fast, random access, stores large data	HDD
Optical Disk	Uses laser, removable	CD/DVD
Flash Memory	No moving parts, fast, portable	Pen drive, SSD

Impact vs Non-Impact Printers

Impact	Non-Impact
Physical contact with paper	No physical contact
Dot Matrix, Daisy Wheel	Inkjet, Laser
Noisy, slow	Quiet, faster

Soft Copy vs Hard Copy

Soft Copy	Hard Copy
Seen on monitor	Printed on paper
Temporary	Permanent
